Continuation of 3: NOTE: Claim 10 has been amended to include the limitations, "copying an identifier for identifying a format that is managed by a first file for managing information recorded on the recording medium and a table including clip information and edit information; creating a second file including said identifier copied for identifying a format, and label information describing content of the data, further comprising setting said label information, wherein creating the second file includes the identifier copied for identifying a format and said label information, and recording the second file so that the second file is recorded in the format identified by the identifier on the recording medium, as a file that is different from the first file; and comparing an identifier included in the second file with an identifier included in the first file recorded onto the recording medium, wherein recording the second file in the format identified by the identifier on the recording medium only when it is determined as a result of comparison by the comparing means that the identifier included in the second file matches with the identifier included in the first file". Claim 11 has been amended to include the limitations, "a computer program product comprising a tangible computer readable medium including program code stored thereon, for allowing a computer to execute processing for managing data that is recorded on the recording medium, the program code being executable to perform operations comprising; copying an identifier for identifying a format that is managed by a first file for managing information recorded on the recording medium, the identifier being included in the first file; creating a second file including said identified copied for identifying a format, and label information describing content of the data, further comprising setting said label information, wherein creating the second file includes the identifier copied for identifying a format and said label information, and recording the second file so that the second file is recorded in the format identified by the identifier on the recording medium, as a file that is different from the first file; and comparing an identifier included in the second file with an identifier included in the first file recorded onto the recording medium, wherein recording the second file in the format identified by the identifier on the recording medium only when it is determined as a result of comparison by the comparing means that the identifier included in the second file matches with the identifier included in the first file". Claim 12 has been amended to include the limitations, "wherein a first file including an identifier for identifying a format on the recording mediuim, the first file serving to manage data in the format, and a second file including an identifier that is the same as the identifier for identifying a format in the first file, the second file further including label information describing content of the data in the format, are recorded in the format as mutually different files on the recording medium". Claim 13 has been amended to depent on claim 1 and claims 14 and 15 are new. All these limitations above were not presented earlier and therefore require further search and consideration.

Applicant's arguments filed March 17, 2010 have been fully considered but are not persuasive.

(a) Applicant argues on page 16, lines 1-2 that the application is in condition for allowance. Examiner disagrees for the reasons stated above.
